# ABOUT CORTELLIS COMPANY DETAILED PIPELINE REPORT

Thomson Reuters provides the knowledge, tools, and expertise to help support drug discovery and development activities, IP portfolio optimization, identification of licensing and partnering opportunities, delivery of successful regulatory submissions, and the ability to keep current with the rapidly-changing pharmaceutical and chemical markets, supporting informed, early decisions.

This report was created by Thomson Reuters, using information from *Thomson Reuters Cortellis™ for Competitive Intelligence*; a comprehensive, proven intelligence solution that leverages the most accurate, complete, and widely respected drug pipeline information. From drug discovery and development activities to patent reports, the latest deals, and partnering opportunities, *Cortellis* can provide the confidence to make the most informed business decisions, faster. *Cortellis for Competitive Intelligence* provides accurate and validated information on pharmaceutical and biotechnology companies globally, their drug pipelines, deals, patents, and clinical trials, plus breaking industry news and conference coverage. All contained in one simple, highly intuitive research platform.

*Cortellis* Company Detailed Pipeline reports are the second in a series of that track pharmaceutical and biotechnology companies worldwide. All *Cortellis for Competitive Intelligence* content is subject to the most comprehensive editorial review process available, conducted by scientists, pharma professionals, regulatory experts, and generics specialists. Featuring timely drug pipeline information expertly uncovered and integrated from over 400 global meetings each year, you'll always be on top of the latest developments.

Chosen by leading life sciences companies, their executives and investors, *Cortellis for Competitive Intelligence* accelerates your deal-making and gives you timely insights on the development landscape.

**Discover undiscovered opportunities in drug development and licensing faster with *Thomson Reuters Cortellis™ for Competitive Intelligence***

## GLOSSARY

### Number of Drugs in Active Development

Number of drugs associated with the company or subsidiary that are currently in active development, i.e. the development status for the drug(s) is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

### Number of Inactive Drugs

Number of drugs associated with the company or subsidiary that are currently classified as inactive, i.e. where the development status for the drug(s) is one of the following: No Development Reported, Discontinued, or Withdrawn.

### Number of Patents as Owner

Number of patents associated with the company where the company is listed as owner; i.e. the relationship type (or way the patent refers to the company) is: Patent Assignee/Owner, Patent owner (not assignee), Licensee for development and marketing, Licensee – marketing only (Distributor), Patent assignee of family member, Inferred assignee.

### Number of Patents as Third Party

Number of patents associated with the company where the company is listed as third party; i.e. the relationship type (or way the patent refers to the company) is: Patent assignee (not owner), Ex-Licensee for development and marketing, Ex-Licensee marketing only (Distributor), Customer of technology, Ex-Customer of technology, Patent opponent or infringer, Affiliate organization of inventor, Owner of underlying technology.

### Patents summary table

This table represents a summary of the core patent coverage for this company covering Therapeutic EP, US and WO patents since 1990 only.

### Number of Deals

A count of deals where the company or one of its subsidiaries is the primary company.

### Key Indications

Displays top ten key indications for the company and its subsidiaries based on frequency (indications occurring with high and identical frequency are always included, and this may result in more than ten Key Indications being listed). Includes both indications associated with patents where the company is patent owner and indications associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

### Key Target-based Actions

Displays top ten key target-based actions for the company and its subsidiaries based on frequency (actions occurring with high and identical frequency are always included, and this may result in more than ten Key Target-based Actions being listed). Includes both target-based actions associated with patents where the company patent owner and target-based actions associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended. A target-based action is one that is associated with a target.

### Key Technologies

Displays top ten key technologies for the company and its subsidiaries based on frequency (technologies occurring with high and identical frequency are always included, and this may result in more than ten Key Technologies being listed). Includes both key technologies associated with patents where the company relationship is patent owner and key technologies associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

## COMPANY OVERVIEW

Company Name	ChemoCentryx Inc
Parent Company Name	ChemoCentryx Inc
Website	http://www.chemocentryx.com/
Country	US
Number of Drugs in Active Development	9
Number of Inactive Drugs	12
Number of Patents as Owner	53
Number of Patents as Third Party	0
Number of Deals	4
Key Indications	Autoimmune disease,Inflammatory disease,Inflammatory bowel disease,Rheumatoid arthritis,Restenosis,Multiple sclerosis,Vasculitis,Atopic dermatitis,Cancer,Metabolic disorder,Non-insulin dependent diabetes
Key Target-based Actions	CCR1 chemokine antagonist,CCR9 chemokine antagonist,CCR2 chemokine antagonist,CXCR7 chemokine antagonist,Complement C5a receptor antagonist,Chemokine receptor-like 1 antagonist,CCR4 chemokine antagonist,CD11b antagonist,CXCR3 chemokine antagonist,CXCR4 chemokine antagonist,CXCR6 chemokine antagonist
Key Technologies	Small molecule therapeutic,Oral formulation,Capsule formulation,Systemic formulation unspecified,Crystalline form,Analytical method,Antibody,Diagnostic method,Drug screening,Fluorescence,Imaging,Immunodetection,Monoclonal antibody humanized,Peptide,Radiolabeling

## COMPANY PROFILE

### SUMMARY

ChemoCentryx is a private technology and drug discovery company located in the US, and is committed to the R&D of orally-delivered small molecule therapeutics for infectious and inflammatory diseases based on the biology of chemokines and chemokine receptors.

Initial funding for the company was provided through a Research, Collaborative and Investment Agreement with Techne Corp and their subsidiary, R&D Systems. Major non-dilutive support has also been obtained through the Defense Advanced Research Program through two separate grants.

### LICENSING AGREEMENTS

In August 2006, GlaxoSmithKline (GSK) and ChemoCentryx joined forces to develop drugs targeting chemokine and chemoattractant receptors for the treatment of inflammatory disorders. The deal included CCX-282, for which ChemoCentryx retained an option to codevelop and comarket to US specialists. ChemoCentryx would receive \$63.5 million in cash and series D financing upfront, research funding, up to \$1.5 billion in milestone payments and double-digit royalties.

### EARLY R&D

By April 2008, the company was evaluating compounds targeting chemokine receptors such as CCR5, CCR10, CCR12 and CXCR2 for preclinical development.

### FINANCIAL

In February 2012, the company priced an IPO of 4.5 million shares at \$10.00 per share, and underwriters were granted a 30-day option to purchase an additional 0.675 million shares, to cover overallotments. The shares would begin trading on the NASDAQ Global Market under 'CCXI' symbol from February 08, 2012. At that time, the offering was expected to close on February 13, 2012; the offering was completed later in February 2012; at that time, the company raised \$63.7 million gross proceeds from the private placement. Net proceeds raised were \$57 million.

[Return to Table of Contents](#)

In June 2006, ChemoCentryx completed a series C financing, raising \$17.7 million.

In June 2004, ChemoCentryx announced that it had closed a private financing round raising gross proceeds of \$33 million. HBM BioVentures and Alta Partners acted as significant new investors in the round.

#### **R&D GRANTS**

In October 2003, the NIAID awarded ChemoCentryx a \$14 million grant to develop first-in-class immune modulatory agents targeting chemokine receptors, for the prevention and treatment of infectious diseases that may be caused by biological warfare pathogens.

<b>Other Actions</b>	Hypoglycemic agent;Anti-inflammatory
<b>Technologies</b>	Oral formulation;Capsule formulation;Small molecule therapeutic
<b>Last Change Date</b>	28-Nov-2012

#### CCX-140 DEVELOPMENT PROFILE

##### SUMMARY

ChemoCentryx is developing CCX-140 (CCX-140-B), a small-molecule CCR2 receptor antagonist, for the potential oral treatment of type 2 diabetes, kidney disease and inflammatory conditions such as vascular restenosis and multiple sclerosis,. In January 2010, a phase II trial for type 2 diabetes was initiated ; by January 2011, the trial had been completed. By May 2008, a phase I single-dose trial had begun for vascular restenosis and multiple sclerosis. It was to be followed by a phase I multiple-dose trial then safety and proof-of-concept trials in patients with inflammatory or metabolic diseases ; by March 2010, phase I trials had been completed. By July 2011, the drug was listed as being in phase II development for chronic kidney disease. In March 2012, the company planned to launch CCX-140 in North America. In October 2011, a phase II trial for diabetic nephropathy was initiated ; in October 2012, the company expected to report data from two phase II studies in 2013. In December 2011, the company planned to initiate phase III clinical development on completion of the phase II trial in diabetic nephropathy. In October 2012, the company was seeking to outlicense the drug to Ex-North American partner.

Inactive Companies	Forest Laboratories Inc
Highest Status	Phase 2 Clinical
Active Indications	Rheumatoid arthritis
Target-based Actions	CCR1 chemokine antagonist
Other Actions	Leukocyte infiltration inhibitor;Anti-inflammatory
Technologies	Oral formulation;Small molecule therapeutic
Last Change Date	14-Jun-2012

### CCX-354 DEVELOPMENT PROFILE

#### SUMMARY

ChemoCentryx and GlaxoSmithKline (GSK) are developing CCX-354 (CCX0354-C, 2941266, GSK-2941266), a small-molecule CCR1 chemokine antagonist, for the potential oral treatment of inflammatory diseases such as rheumatoid arthritis (RA). In December 2009, a phase I/II trial for RA was initiated ; by October 2011, the trial had been completed.

This program possibly stemmed from ChemoCentryx CCX-105 series of anti-inflammatory agents.

Forest Laboratories was previously collaborating with ChemoCentryx on this program ; however, by December 2005, the collaboration had been terminated, and Forest was no longer involved.

### CCX-168 DEVELOPMENT PROFILE

#### SUMMARY

ChemoCentryx, subject to an alliance with GlaxoSmithKline (GSK), is developing CCX-168, the lead in a series of small molecule, orally bioavailable C5a receptor antagonists, for the potential treatment of autoimmune and inflammatory diseases, such as age-related macular degeneration, particular types of vasculitis, glomerulonephritis, rheumatoid arthritis and systemic lupus erythematosus,. In August 2011, a phase II renal vasculitis trial was initiated ; in March 2012, the company expected to complete the patient enrollment by the end of 2012.

## CXCR7 antagonists, ChemoCentryx

### CXCR7 antagonists, ChemoCentryx SNAPSHOT

Drug Name	CXCR7 antagonists, ChemoCentryx
Key Synonyms	
Originator Company	ChemoCentryx Inc
Active Companies	ChemoCentryx Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Glioblastoma;Cancer;Inflammatory disease
Target-based Actions	CXCR7 chemokine antagonist
Other Actions	Anticancer;Angiogenesis inhibitor;Anti-inflammatory
Technologies	Oral formulation;Small molecule therapeutic
Last Change Date	12-Sep-2012

### CXCR7 antagonists, ChemoCentryx DEVELOPMENT PROFILE

#### SUMMARY

ChemoCentryx is investigating CXCR7 antagonists, including orally administered CCX-754 for the potential treatment of cancer, CCX-733 for inflammation and CCX-662, for glioblastoma and other cancers . In September 2010, the program was listed on the company's pipeline as being in preclinical studies. In June 2011, CCX-662 was listed as being in preclinical development . In June 2012, preclinical data were presented. In September 2012, the company planned to initiate phase I development for CCX-662 in the first half of 2013. In October 2011, the company was seeking to outlicense CCX-662.

### CXCR7 antagonists, ChemoCentryx DEVELOPMENT STATUS

#### CURRENT DEVELOPMENT STATUS

Company	Indication	Country	Development Status	Date
ChemoCentryx Inc	Cancer	US	Discovery	24-Feb-2005
ChemoCentryx Inc	Glioblastoma	US	Discovery	13-Dec-2010
ChemoCentryx Inc	Inflammatory disease	US	Discovery	07-Jul-2009

CCX-662	Research Code
CXCR7 antagonists, ChemoCentryx	
CCX-733	Research Code

## CCR1 antagonists (autoimmune diseases), ChemoCentryx

### CCR1 antagonists (autoimmune diseases), ChemoCentryx SNAPSHOT

Drug Name	CCR1 antagonists (autoimmune diseases), ChemoCentryx
Key Synonyms	
Originator Company	ChemoCentryx Inc
Active Companies	ChemoCentryx Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Autoimmune disease
Target-based Actions	CCR1 chemokine antagonist
Other Actions	Chemotaxis inhibitor
Technologies	Small molecule therapeutic
Last Change Date	04-Jun-2012

### CCR1 antagonists (autoimmune diseases), ChemoCentryx DEVELOPMENT PROFILE

#### SUMMARY

ChemoCentryx is investigating CCR1 antagonists, for the potential treatment of autoimmune diseases, including rheumatoid arthritis. In May 2012, preclinical data were presented.

### CCR1 antagonists (autoimmune diseases), ChemoCentryx DEVELOPMENT STATUS

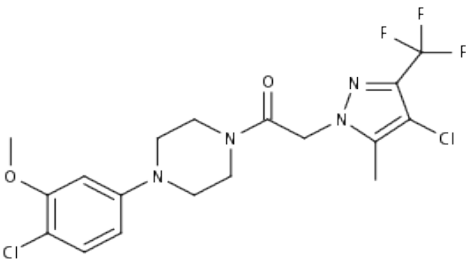

#### CURRENT DEVELOPMENT STATUS

Company	Indication	Country	Development Status	Date
ChemoCentryx Inc	Autoimmune disease	US	Discovery	21-May-2012

## CCR4 antagonist (oral, pulmonary diseases/atopic dermatitis/autoimmune disease), ChemoCentryx

### CCR4 antagonist (oral, pulmonary diseases/atopic dermatitis/autoimmune disease), ChemoCentryx SNAPSHOT

<b>Drug Name</b>	CCR4 antagonist (oral, pulmonary diseases/atopic dermatitis/autoimmune disease), ChemoCentryx
<b>Key Synonyms</b>	
<b>Originator Company</b>	ChemoCentryx Inc
<b>Active Companies</b>	ChemoCentryx Inc
<b>Inactive Companies</b>	
<b>Highest Status</b>	Discovery
<b>Active Indications</b>	Lung disease;Autoimmune disease;Atopic dermatitis
<b>Target-based Actions</b>	CCR4 chemokine antagonist
<b>Other Actions</b>	Anti-inflammatory;Dermatological agent
<b>Technologies</b>	Oral formulation;Small molecule therapeutic
<b>Last Change Date</b>	13-Sep-2012

### CCR4 antagonist (oral, pulmonary diseases/atopic dermatitis/autoimmune disease), ChemoCentryx DEVELOPMENT PROFILE

#### SUMMARY

ChemoCentryx is investigating a small molecule CCR4 chemokine antagonist, for the potential oral treatment of pulmonary diseases, autoimmune diseases and atopic dermatitis. In June 2011, the drug was listed as being in preclinical development ; in September 2012, this was still the case.

### CCR4 antagonist (oral, pulmonary diseases/atopic dermatitis/autoimmune disease), ChemoCentryx DEVELOPMENT STATUS

#### CURRENT DEVELOPMENT STATUS

Company	Indication	Country	Development Status	Date
ChemoCentryx Inc	Atopic dermatitis	US	Discovery	23-Jun-2011
ChemoCentryx Inc	Autoimmune disease	US	Discovery	12-Sep-2012
ChemoCentryx Inc	Lung disease	US	Discovery	23-Jun-2011

## CXCR6 antagonist (oral, inflammatory/autoimmune diseases), ChemoCentryx

### CXCR6 antagonist (oral, inflammatory/autoimmune diseases), ChemoCentryx SNAPSHOT

Drug Name	CXCR6 antagonist (oral, inflammatory/autoimmune diseases), ChemoCentryx
Key Synonyms	
Originator Company	ChemoCentryx Inc
Active Companies	ChemoCentryx Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Inflammatory disease;Autoimmune disease
Target-based Actions	CXCR6 chemokine antagonist
Other Actions	Anti-inflammatory
Technologies	Oral formulation;Small molecule therapeutic
Last Change Date	13-Sep-2012

### CXCR6 antagonist (oral, inflammatory/autoimmune diseases), ChemoCentryx DEVELOPMENT PROFILE

#### SUMMARY

ChemoCentryx is investigating CXCR6 antagonist, for the potential oral treatment of autoimmune disease and inflammation, including lung inflammation. In June 2011, the drug was listed as being in preclinical development ; in September 2012, this was still the case.

### CXCR6 antagonist (oral, inflammatory/autoimmune diseases), ChemoCentryx DEVELOPMENT STATUS

#### CURRENT DEVELOPMENT STATUS

Company	Indication	Country	Development Status	Date
ChemoCentryx Inc	Autoimmune disease	US	Discovery	09-Dec-2011
ChemoCentryx Inc	Inflammatory disease	US	Discovery	23-Jun-2011

### CXCR6 antagonist (oral, inflammatory/autoimmune diseases), ChemoCentryx DRUG NAMES

Names	Type
CXCR6 antagonist (oral, inflammatory/autoimmune diseases), ChemoCentryx
